CORNUFÉ

COLLECTION

The CornuFé has long been the heart of extraordinary kitchens, bringing together more than a century of French craftsmanship with a passion for cooking, gathering, and beautiful living. More than an appliance, every range is crafted to become a personal expression of style and a lasting centerpiece for the home.

Available in two sizes, a palette of hand-selected colors, elegant trim finishes, and your choice of dual fuel or induction cooking, every CornuFé is uniquely your own. Beautifully matched cabinetry completes the picture, extending the character of the range with thoughtfully coordinated storage and creating a kitchen that feels effortlessly custom. The pages that follow will guide you through the experience, making it easy to personalize your CornuFé and discover just how simple it is to create the kitchen you've always imagined.

THE

CORNUFÉ 90 ALBERTINE

DUO

Our new joinery kits seamlessly bridge two adjacent CornuFé 90 ranges, creating the look of a single custom appliance while delivering the extraordinary capability of eight burners and two full-size ovens in one beautifully unified cooking suite. The result is a refined built-in aesthetic that elevates the visual flow of the kitchen without the need for costly millwork or custom fabrication.

A dedicated joining kit is required for each fuel type. At this time, connection is possible only between two Dual Fuel ranges or two Induction models. Mixed configurations are not supported due to the differing appliance depths inherent to each fuel type.

It's a smart, elegant solution that adds both exceptional cooking capacity and seamless architectural cohesion to your kitchen.

DESIGN

EXTEND THE BEAUTY.
COMPLETE YOUR CORNUFÉ.

A CornuFé range is designed to be the centerpiece of the kitchen. The CornuFé Kitchen Collection allows that presence to extend beyond the range itself, introducing beautifully matched metal cabinetry that carries its distinctive style throughout the kitchen while blending effortlessly with traditional custom cabinetry.

Rather than simply sitting beside the range, each cabinet is designed to become part of the composition. Carefully coordinated proportions, precisely aligned drawer lines, and matching door reveals create a seamless visual connection that makes the range feel broader, more substantial, and fully integrated into the architecture of the kitchen. The result is the impression of a more substantial centerpiece while adding beautifully functional storage exactly where it is needed.

By adding just two or four perfectly matched cabinets, you can extend the presence of the range, create valuable storage, and give your kitchen the appearance of a beautifully custom installation. It's one of the simplest ways to transform your kitchen without a complete renovation.
